SKLARHONE™ FOR KNIFE EDGE SHARPNESS WITH SCISSORS PRECISION

With the addition of SKLARHONE premium operating room scissors, Sklar continues its effort to provide the surgeon with the most current technology and the largest selection of superior instruments. SKLARHONE scissors combine the razor sharp cutting edge of a knife, with the control and precision of scissors, in one instrument. One blade on the SKLARHONE scissors is crafted with the cutting geometry of a knife, while the opposing blade has a standard smooth, scissors edge for clean cutting action. SKLARCUT SKLARHONE scissors combine a serrated lower blade to hold tissue with a knife-like upper blade, leaving the edges smooth and clean when cutting thick tissue. For easy visual distinction from the normal scissors, these scissors come with dual black handles and shafts.
