SKLAR Cervix Brush is made of polyethylene and has a total length of 20 centimeters. The top portion uses a soft flexible brush to obtain cell samples. The brush consists of 57 semi-circular plastic bristles of various lengths. The shape is such that the top edges of the brush follow the contours of the cervix. The longer middle bristles reach deep into the endocervical canal. The shorter bristles touch both the ectocervical area and transformation zone at the same time.

Sklar has 5 choices of quality surgical instruments...more than any other company!

OR GRADE

**Sklar OR Quality Instruments**

Our best operating room quality instruments incorporating the highest grades of surgical steel, finely detailed craftsmanship and exacting standards of manufacturing. These instruments are imported from Germany.

PREMIUM GRADE

**Sklar Premium™ Instruments**

Our finest OR grade instruments with the addition of a unique Sklar performance feature to meet the specific surgical needs of the clinician.

MID GRADE

**Surgi-OR™ Mid-Grade Quality Instruments**

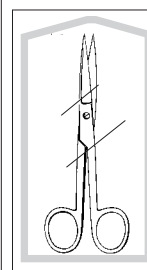

These mid-grade instruments are forged from surgical grade stainless steel and crafted to offer significant value at reduced costs for the operating room as well as other important surgical settings.

OFFICE INSTRUMENTATION

**Merit Office Instrumentation**

A cost-effective line of instruments ideally suited for routine, minor surgical use in the office setting.

FLOOR GRADE, STERILE

**Econo Sterile™ Instruments**

The added convenience and cost-savings of these ready-to-use sterile instruments make Econo Sterile an exceptional value.

ESMARK BANDAGE KITS

Esmark bandages offer maximum and consistent pressure to extremities for exsanguination prior to surgery.

FEATURES/BENEFITS

- Smooth, comfortable material
- Provides consistent elongation for optimum compression
- Ease of use
- 6 sizes available in Latex and Latex-Free
- Conveniently packaged in sterile pouch.

Each Esmark Bandage Kit contains 1 Bandage and 1 CSR Wrap.

Sklar does not represent or warrant that the products it sells offer absolute protection from exposure to blood, contaminants, infectious diseases, or the risk of contracting infectious diseases. Consistent with OSHA requirements, employers assess each medical task to be performed and the type of blood or contaminant exposure that is expected. Employers then choose appropriate protective apparel for employees in order to prevent contamination of their skin or clothing.

SKLAR CSR WRAPS

A non-woven, non-absorbent sterilization wrap, which is soft yet, durable, and drapes like a cloth. Sklar's CSR wrap is designed as a protective wrap in order to sterilize products by steam, and ethylene oxide sterilization.

CSR wraps are ideally suited for operating room, central supply, kit packing and other areas where equipment is wrapped prior to sterilization.

STERILE DISPOSABLE SKLAR CLEANWHEEL

Prevents cross-infection (MRSA, HEP B) during Diabetic foot testing and routine Orthopedic, Neurologic and Neurosurgical Examinations, in the ER or exam room, giving the Doctor a rapid assessment without the worry of cross-infection.

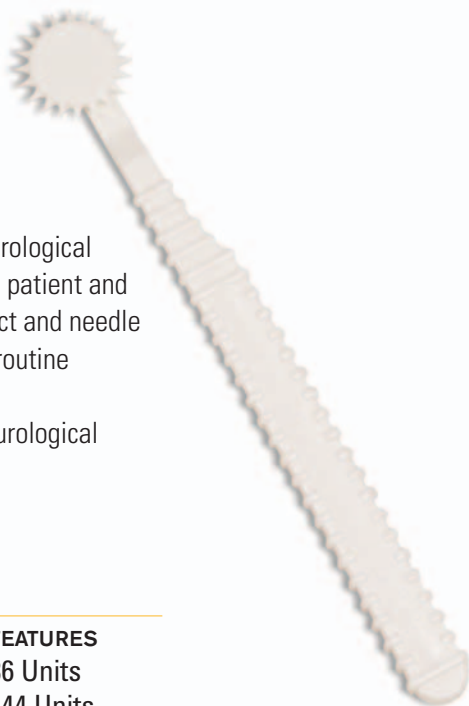

SKLAR STERILE DISPOSABLE CLEANWHEEL

Professional, single-use neurological pinwheel. Protects both the patient and the doctor from direct contact and needle stick cross-infection during routine sensory examinations. Recommended for initial neurological assessment.

STERILE

PRODUCT NUMBER	FEATURES
96-7905	36 Units
96-7907	144 Units

The Cleanwheel® A Brief History

For decades, doctors have been using neurological pinwheels to test a patient's ability to feel sensation over a particular area of skin. Loss of feeling over a "dermatome" (as these areas of skin are referred to) alerts doctors to the probability of nerve function loss, which in turn helps doctors to determine the further diagnostic studies and / or appropriate care needed for a myriad of possible causes.

Today, doctors continue to use non-sterile metal pinwheels, safety pins - and even paper clips for sensitively testing. These practices raise serious cross-infection potential for both topical and bloodborne pathogens - as well as reliability concerns with patient response to testing.

DERMAL CURETTES
SURGICAL STEEL TIPS**

The surgical grade steel tip is mounted on a sturdy plastic handle and correctly positioned to efficiently affect curettage

YANKAUER SUCTION TIPS

The SKLAR Yankauer is a rigid, curved, one-piece design, made from a blend of clear, blue-tinted, shatterproof plastic. Edges are smooth and clean, with no flash or parting lines. Clear tips permit visual monitoring of suction fluids. A ribbed, universal connector fits securely on all types of tubing. SKLAR Yankauers are available with or without a suction control vent, in two tip styles.

SUCTION CONNECTING TUBE

Choose from several lengths. Durable 5 or 6 mm inner diameter tubing withstands heavy duty suctioning. Each end has two soft female connectors securely fit any male connector.

INSTRUMENT CARE AND CLEANING

SKLAR-CIDE™

HIGH LEVEL DISINFECTING / STERILIZING SOLUTION

Sklar-Cide™ provides a safe and efficient means for the high-level disinfection or sterilization of medical, ophthalmic, dental and surgical devices including endoscopes and lensed instruments. It may be used as a standard soak solution or in automatic reprocessing units set at room temperature. Unlike other solutions, there is no need to increase the solution temperature to provide high-level disinfection in 25 minutes.

Sklar-Cide™ is a surfactant-free, activated glutaraldehyde liquid chemical sterilant and high-level disinfectant. Its active ingredient is glutaraldehyde in a nominal concentration of 3%. When the powered activator is added, the solution turns green in color to indicate its readiness for use. In addition to the active ingredient, this ready-to-use solution contains buffers, wetting agents, and a rust and corrosion inhibitor and it has a pleasant fragrance.

Sklar-Cide™ produces high-level disinfection at room temperature in as little time as 25 minutes, and complete sterilization in 10 hours at room temperature.

INSTRUMENT CARE AND CLEANING

SKLAR DISINFECTANT™

READY-TO-USE SPRAY SURFACE DISINFECTANT

3 Minute Kill Time!

- Ready to use, non-toxic formula
- Specially formulated for the control of cross contamination
- Effective against C. Diff, TB, HBV, HCV, Hydrophilic and Lipophilic viruses including HIV-1 (AIDS Virus), bacteria and fungi on inanimate objects.
- Safe for all areas of the facility including the NICU, operating rooms, isolation rooms, patient care areas and laboratories
- Satisfies OSHA's Bloodborne Pathogen Standards
- Non-irritating formula
- EPA registered

SKLAR SPRAY-ZYME™

MULTI-ENZYME BASED INSTRUMENT PRESOAK & CLEANER

The newest product from Sklar for expert care of your surgical instruments. This multi-enzymatic spray creates a heavy foam which lasts for hours, keeping soiled instruments moist to avoid encrustation while also pre-cleaning prior to processing.

SKLAR-ZYME™

POUCHES

CONVENIENT VALUE

Each pouch of SKLAR-ZYME produces one gallon of enzymatic detergent. This convenient, easy to use product guarantees very little waste and is ideal for the office or smaller surgical setting.

SKLAR SOAK

- Non-Glutaraldehyde
- PH Neutral Formula Designed for Safe Use on all Surgical Instruments and Stainless Steel

Immersing soiled instruments in SKLAR SOAK for three minutes substantially reduces the risk of exposure to many infectious organisms including TB and such viruses as HIV-1 (AIDS) as well as C. Diff bacteria and fungi.

If full immersion is not possible then cover soiled instruments with SKLAR SPRAY ZYME enzymatic foam to prevent harmful encrustation while also precleaning.

- Non-Caustic Formula allows for use as a manual cleaner or in ultrasonic units.
- Effective Against: C. Diff, TB, HBV, HIV-1 (AIDS), virus (hydrophilic and Lipophilic), cc bacteria (including MRSA and VRE), and fungi.
- EPA Registered
- Meets all OSHA standards on blood borne pathogen destruction
- Ready to use

SKLAR INSTRU-GUARD™ ONE STEP

A "ONE STEP"
INSTRUMENT CLEANER
AND LUBRICANT

Extends Instrument Life

SKLAR INSTRU-GUARD contains a penetrating lubricant that protects and helps extend the life of surgical instruments. The detergents and emulsifiers quickly break up and remove organic soils from box locks and other hard to reach places.

SKLAR INSTRU-GUARD contains four rust inhibitors to control corrosion and eliminate scaling and spotting. It does not contain phosphates and can reduce the time and cost involved in processing your instruments by cleaning and lubricating in one easy step.

SKLAR INSTRU-GUARD LUBE™

SURGICAL INSTRUMENT LUBRICANT / RUST INHIBITOR

- Increase the Life of Instruments
- Protects all Surgical Instruments

SKLAR INSTRU-GUARD LUBE is an easy-to-use, water soluble, non-silicone lubricant and rust inhibitor. When used daily as a rinse after every cleaning it keeps moving parts operating smoothly and remains effective after autoclaving, but without leaving an oily residue.

Regular lubrication is essential no matter which cleaning method is employed (including ultrasonic). SKLAR INSTRU-GUARD LUBE is ideal for maintaining instrument quality and performance

SKLAR KLEEN™ LOW FOAM

SKLAR KLEEN™ LF (Low Foam) is an especially effective and economical liquid cleaner for surgical instruments and laboratory glassware. SKLAR KLEEN™ LF maintains a low foam to ensure efficient and trouble free action in washer/sterilizers and tunnel washers. The low, non-aggressive pH (7.5 ± 0.5) is non-corrosive to surgical instrumentation and will not etch glassware. SKLAR KLEEN™ LF is formulated to disperse quickly and is well suited for automatic injection systems. SKLAR KLEEN™ LF is concentrated in order to provide a very cost-effective solution.

CASE / 4

PRODUCT NUMBER	FEATURES
10-2701	1 Gallon Bottles

SKLAR KLEEN™ LIQUID DETERGENT REGULAR FORMULA FOR MANUAL AND ULTRASONIC CLEANING

SKLAR KLEEN™ LIQUID is non-corrosive, non aggressive, phosphate free and biodegradable. We have specifically developed SKLAR KLEEN™ LIQUID for manual and ultrasonic cleaning. It is moderately alkaline, affording optimum cleaning without etching glassware or attacking instrument metal.

SKLAR ENZYMATIC™ DETERGENT

MULTI-ENZYME
DETERGENT
CONCENTRATE

100% Biodegradable

SKLAR ENZYMATIC DETERGENT is a low-foaming, fast acting detergent specifically designed for use when instruments and/or cloth materials become soiled with organic debris.

SKLAR ENZYMATIC DETERGENT may be used as a manual instrument cleaner as well as a pre-soak for blood-contaminated linens, clothing and instruments. It is also used in ultrasonic units and in washer/sterilizer/decontaminators. When used as directed, the enzymatic pH neutral formula is safe for use on rubber, plastic, stainless steel instruments, and surgical equipment as well as cloth.

CASE / 4

PRODUCT NUMBER	FEATURES
10-2777	1 Gallon Bottles

AS **EASY** AS **1** DECONTAMINATION **2** CLEANING **3** LUBRICATION!

STEP ONE - **DECONTAMINATION**

SKLAR SPRAY DISINFECTANT™

DISINFECTANT/DECONTAMINANT CLEANER WITH A 3 MINUTE KILL TIME!

SKLAR DISINFECTANT™ is a pre-cleaner and disinfectant for the safe decontamination of soiled surgical instruments, medical and surgical equipment, and inanimate surfaces including plastics, stainless steel, chrome, glass, Plexiglass® and baked on painted surfaces. The use of Sklar Disinfectant™ for 3 minutes kills infectious organisms including Hepatitis B Virus, Hepatitis C Virus, TB, HIV-1 (AIDS), Herpes Simplex Virus 1 and 2 and Polio.

STEP TWO - **CLEANING**

SKLAR KLEEN DETERGENTS AND ENZYMATICS

Sklar has an array of agents for effectively cleaning not only your surgical instruments, but for other metals, glassware, plastic, and rubber. SKLAR KLEEN detergent is available as a powder or liquid. Our ENZYMATIC products, specially formulated for processing instruments heavily laden with organic debris, are concentrated and available in a variety of sizes. Sklar also offers SPRAY-ZYME a new foam spray pre-cleaner.

CHOOSE THE CLEANING PRODUCT RIGHT FOR YOU!

STEP THREE - **LUBRICATION**

SKLAR LUBRICANT AND SPRAY LUBE

SKLAR LUBE should be a part of your instrument processing regimen to guarantee extending the life and performance of this very important investment. Sklar offers several different types of lubricant to suit your needs. All designed specifically for surgical instruments, they each contain rust inhibitors to protect against corrosion, rusting, and staining.

**YOUR INSTRUMENTS
WILL LOOK AND
WORK LIKE NEW!**

**YOUR FINAL STEP IS

TROUBLE SHOOTING

CORROSION

- Problem:** Debris and residue in box locks, serrations and ratchets.
- Solution:** Serrations, box locks and ratchets should be carefully cleaned and rinsed. A soft bristle brush is effective in these difficult areas.
- Problem:** Moisture remaining on the instruments within the sterile wrapped packs; excessive moisture in autoclave during sterilization and termination of cycle.
- Solution:** Preheat autoclave, drying time cannot be accelerated, open autoclave door slightly. Routinely inspect valves. Malfunctioning valves can precipitate corrosion.
- Problem:** Some local water supplies contain excessive quantities of alkali. This can manifest itself by depositing corrosive matter on the instruments.
- Solution:** It is generally accepted that cold distilled or demineralized water be used during sterilization. An alternative is to use the local water supply, while instituting a program of preventive maintenance. Carefully clean surfaces with SKLAR KLEEN™, using SKLAR POLISH™ to remove difficult stains and SKLAR LUBE™ for proper lubrication.

PITTING

- Problem:** Instruments are inevitably exposed to chemical compounds that initiate pitting. The most common are saline solutions and blood.
- Solution:** It is essential that instruments be rinsed with distilled or demineralized water and then cleaned routinely.
- Problem:** Some Non-Sklar detergents contain a chloride or have an acid base. If rinsing is not thorough, the residual detergent can precipitate pitting. Hydrochloric acid can be formed by the combination of chloride in the cleaner and steam, causing the instrument to pit.
- Solution:** Evaluate detergents without a chloride base. SKLAR KLEEN™ is recommended.
- Problem:** Instruments may be pitted when the detergent used has an excessively high PH. If instruments are not rinsed thoroughly, and then autoclaved, the heat increases the effect of the solution on the instruments.
- Solution:** Use only detergents specifically developed for instrument cleaning. Sklar Kleen™ products are pH balanced.

BROWNISH STAIN

- Problem:** This stain is more obvious on dull finish instruments. Most likely, it is a deposit of chromium oxide. The thin hard layer protects stainless steel from corrosion precipitated by the atmosphere. The brownish film (sometimes dull blue) occurs naturally when stainless is heated. Occasionally this stain can be traced to the sterilizer. Improper cleaning compounds could contain polyphosphates that cause the copper components in the sterilizer to be deposited by electrolytic action on the stainless steel instruments.
- Solution:** Water supply to autoclave should be cold and demineralized. Use the correct amount of SKLAR KLEEN™ as recommended for best results.

BLUISH GRAY STAINS

- Problem:** Cold sterilizing solutions.
- Solution:** In the preparation of the solution make certain the manufacturer's directions are followed accurately. To minimize discoloration use distilled water and add a rust inhibitor. Using the solution beyond recommended time limitations will cause the solution to become corrosive.

TROUBLE SHOOTING

No Steel is Truly “Stainless”

It's a fact that so-called stainless steel is subject to both water-spotting and staining. However what many people identify as a “rust” problem usually turns out to be something else.

Most often the problem is actually a stain caused by a surface deposit. These deposits appear in a variety of colors depending upon the type of deposit involved. Once the cause is found and eliminated, most of the time the problem quickly diminishes or disappears completely.

As you probably know, stainless steel is ideally suited for the surgical suite because it is rust resistant, it can be honed to an extremely sharp edge or fine point, and it can be hardened to maintain the delicate, yet precise, requirements of the surgeon. But it is this hardenable quality – the amount of carbon used during the manufacturing process – coupled with harsh chemicals and improper care that renders stainless steel susceptible to corrosion.

Sklar's products are specially formulated to provide cost effective instrument care

RUST DEPOSIT

Problem: Sterilizing instruments of different metals in the same cycle will cause rusting. An electrolytic action carries the carbon particles from the exposed metal and deposits them on the stainless steel instruments.

The rapid oxidation of molecules results in a surface film of rust.

Solution: The ideal technique would be to sterilize the two types of instruments separately. It is recommended that chrome plated instruments that indicate signs of peeling or flaking be replaced with stainless steel instruments.

Problem: The rust film on the surface of stainless steel instruments can be caused by chemicals in the detergent. Excess amounts of iron or other minerals from the local water supply may cause the rust deposits.

Solution: It is recommended that instruments be rinsed with distilled or demineralized water. Surface rust can be removed by light buffing or an application of SKLAR POLISH™.

LIGHT AND DARK COLORED SPOTS

Problem: Spotting caused by slow evaporation of water drops identified with the mineral content of the water.

Solution: Eliminate water droplets by adhering to autoclave manufacturer's operating instructions. Autoclave door should not be opened until steam has been completely vented.

SKLAR INSTRUMENT CARE KIT

A TRIO OF SKLAR'S CARE AND CLEANING PRODUCTS TO KEEP INSTRUMENTS IN TIPTOP SHAPE.

EACH KIT INCLUDES:

- 1 SKLAR SPRAY LUBE, 8 OZ.
- 1 SKLAR KLEEN, 8 OZ.
- 1 SKLAR POLISH, 8 OZ.
- 1 NYLON BRISTLE CLEANING BRUSH

BOOTS

Packs of 3 & 5

96-1550	Mini Package	(3 pair)	Pack of 3
96-1552	Standard Package	(5 pair)	Pack of 5

Color-coded Sklar Suture Boots eliminate the use of cut tubing and catheters, while providing a firmer grip for tagging sutures. Conveniently sterile-packed, radiopaque and non-toxic, Sklar Boots will not damage even the most delicate suture materials.

ID SHEET TAPE

1 Each

96-1845	Dark Blue with White Stripes,	1 each	96-1850	Brown with White Stripes,	1 each
96-1846	Dark Green with White Stripes,	1 each	96-1851	Lavender with White Stripes,	1 each
96-1847	Red with White Stripes,	1 each	96-1852	Light Blue with White Stripes,	1 each
96-1848	Yellow with White Stripes,	1 each	96-1853	Pink with White Stripes,	1 each
96-1849	Orange with White Stripes,	1 each			

Color-coding is convenient with Sklar ID Sheet Tape. There are many combinations of tapes fixed to an easily removed backing. Each 8-1/2" x 11" sheet contains 374" of tape. Lasts through many autoclaving and gas sterilizing procedures.

ID ROLL TAPE

1 Each

96-1860	White, 1 each	96-1870	Purple, 1 each
96-1862	Green, 1 each	96-1872	Blue, 1 each

SKLAR CERVIX BRUSH CERVICAL CELL SAMPLER

SKLARS Cervix Brush is made of polyethylene and has a total length of 20 centimeters. The top portion uses a soft flexible brush to obtain cell samples. The brush consists of 57 semi-circular plastic bristles of various lengths. The shape is such that the top edges of the brush follow the contours of the cervix. The longer middle bristles reach deep into the endocervical canal. The shorter bristles touch both the ectocervical area and transformation zone at the same time.

SKLAR SILICONE VAGINAL DILATORS

Sklar Silicone Vaginal Dilators are used to enlarge the vagina for the purposes of examination, a surgical procedure or for the relief of vaginismus. This is accomplished by supporting or distending the vaginal canal. They are contraindicated in acute genital tract or pelvic infections or with non-compliant patients.

GYN BIOPSY PUNCHES

Precision engineered and hand crafted, Sklar Biopsy Punches are recognized as the finest in the field. A complete selection of forcep tips combined with three specific handle configurations provide the flexibility, comfort and control required by the most selective physicians.

SKLAR OR GRADE

Sklar OR Grade biopsy punches insure the highest level of hand crafted workmanship. The precision, balance and feel of these fine instruments is apparent from the moment the physician lifts it from the tray.

PRODUCT NUMBER	FEATURES
90-6820	Eppendorfer Biopsy Forcep

OR-GRADE INSTRUMENTS

Our finest Surgical Instruments, crafted to the highest standards.

SKLARLITE™

A lighter version of the standard pattern, without sacrificing strength and durability

SKLARLITE XD™

The most sensitive and delicate instruments available

SKLARCUT™

Featuring ultra-fine serrations for improved grip throughout entire cut

SKLARHONE™

Constructed with one knife blade and one standard scissor edge, smooth or serrated

SKLAR EDGE™

Crafted of Tungsten Carbide - the standard for performance and quality - 5-year warranty

SURGI-OR™

Significant value at reduced cost for OPERATING ROOM & SURGERY CENTER and other important surgical settings

MERIT™

For routine surgical use and reliable performance in a variety of clinical settings

ECONO™

Economically manufactured floor-grade instruments - greatest utility at the lowest cost

ECONO-STERILE™

Convenient ready-to-use sterile economy instruments

OR-GRADE INSTRUMENTS

Our finest Surgical Instruments, crafted to the highest standards.

SKLARLITE™

A lighter version of the standard pattern, without sacrificing strength and durability

SKLARLITE XD™

The most sensitive and delicate instruments available

SKLARCUT™

Featuring ultra-fine serrations for improved grip throughout entire cut

SKLARHONE™

Constructed with one knife blade and one standard scissor edge, smooth or serrated

SKLAR EDGE™

Crafted of Tungsten Carbide - the standard for performance and quality - 5-year warranty

SURGI-OR™

Significant value at reduced cost for OPERATING ROOM & SURGERY CENTER and other important surgical settings

MERIT™

For routine surgical use and reliable performance in a variety of clinical settings

ECONO™

Economically manufactured floor-grade instruments - greatest utility at the lowest cost

ECONO-STERILE™

Convenient ready-to-use sterile economy instruments

OR-GRADE INSTRUMENTS

Our finest Surgical Instruments, crafted to the highest standards.

SKLARLITE™

A lighter version of the standard pattern, without sacrificing strength and durability

SKLARLITE XD™

The most sensitive and delicate instruments available

SKLARCUT™

Featuring ultra-fine serrations for improved grip throughout entire cut

SKLARHONE™

Constructed with one knife blade and one standard scissor edge, smooth or serrated

SKLAR EDGE™

Crafted of Tungsten Carbide - the standard for performance and quality - 5-year warranty

SURGI-OR™

Significant value at reduced cost for OPERATING ROOM & SURGERY CENTER and other important surgical settings

MERIT™

For routine surgical use and reliable performance in a variety of clinical settings

ECONO™

Economically manufactured floor-grade instruments - greatest utility at the lowest cost

ECONO-STERILE™

Convenient ready-to-use sterile economy instruments

DISCLAIMERS:

All information concerning product content and composition; the function, care, maintenance, and intended use of products; and any warnings respecting the products in this catalog are derived exclusively from each product's manufacturer. As such, Sklar makes no representations or warranties - either express or implied - respecting the same. If additional information about any product is needed, please contact a Sklar sales representative, who will assist you in obtaining the information from the product's manufacturer.

The convenience kits (FDA recognized term) illustrated in this catalog are representative of Sklar's assembly capabilities. The final design and approval of the kit is the responsibility of the customer and will be managed in accordance with the Sklar Design and Development process.
